

EMMANUEL IKPOMOSA ESEKHAIGBE

Senior Full-Stack Developer, JavaScript/TypeScript, Python & Cloud-Native Systems

Warsaw, Poland • emmanese2020@gmail.com • +48 572 234 126 • linkedin.com/in/emmanuel-esekhaigbe-3b9046241 • aikay-dev.vercel.app • github.com/Aikay-dev

PROFESSIONAL SUMMARY

For the past six years, I've been working almost daily on full-stack development, using JavaScript, TypeScript, React, and Next.js. Additionally, I've dived into Python, honing my skills with tools like FastAPI, SQLAlchemy, pandas, and numpy. Previously, at Biddy, I built event-driven microservices and RESTful APIs, and used NATS.io for inter-service communication. For authentication, I integrated Keycloak for IAM and single sign-on, making the entire login authentication process more centralized and secure. For data, I use Prisma for PostgreSQL, and then deploy these services in a cloud-native way using Docker and Kubernetes. Functionality alone isn't enough for me. I pay close attention to observability, security, and stability at every layer. I also use AI tools to speed up development, but I always personally review every change. Collaborating with product managers, designers, architects, and other cross-functional teams is common for me.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js (App Router), Node.js, NestJS, Express, Python, FastAPI, Django, Flask

Python Ecosystem: FastAPI, SQLAlchemy, pandas, numpy, PyTest

Architecture: Microservices, event-driven architecture, RESTful API design, service-to-service messaging (NATS.io)

Identity & Security: Keycloak, IAM, single sign-on (SSO), application security best practices

Data & Storage: PostgreSQL, Prisma ORM, MongoDB, Redis, SQL optimization

Cloud & DevOps: AWS (EC2, RDS, S3, Lambda, CloudWatch), Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), Git

Operations: Observability, on-call support, incident response, production monitoring

Testing: Jest, Cypress, Playwright, PyTest

Collaboration: Code reviews, pair programming, mentorship, cross-functional collaboration with product managers, designers, and architects, Agile/Scrum

AI Tooling: Claude Code, Cursor, GitHub Copilot, AI-assisted development with manual code review

PROFESSIONAL EXPERIENCE

Lead Founding Developer | Biddy

Remote • Nov 2023 – Jan 2026

- Served as Lead Founding Developer for Biddy, an auction-driven e-commerce marketplace that scaled from initial build to 10,000+ active users.
- Built event-driven microservices and RESTful APIs, using NATS.io for reliable inter-service messaging.
- Integrated Keycloak for IAM and single sign-on, centralizing authentication across the platform.
- Used FastAPI, SQLAlchemy, pandas, and numpy for backend services and data processing tasks.
- Modeled data in PostgreSQL using Prisma, deploying all services in a cloud-native way with Docker and Kubernetes.
- Took full ownership of observability and security across every layer of the stack.

Senior Fullstack Engineer | MarketForce

Remote • Feb 2022 – Aug 2024

- Built and maintained production React, Node.js, and Python applications as part of a senior engineering team.
- Applied consistent design patterns and test-driven development practices using Jest and Cypress.
- Participated in code reviews and cross-functional collaboration within Agile/Scrum sprints.

Lead Web Developer | Vision Speaks

Remote (UK/Nigeria media company) • Dec 2025 – Mar 2026

- Led front-end and back-end development for a UK/Nigeria media company, using React, TypeScript, and Node.js to ship production features.
- Coordinated with a distributed, cross-functional team in an Agile/Scrum environment.

Lead Web Developer | Laura Hope Care & Rescue Foundation

Remote • Sep 2025 – Dec 2025

- Led web development for a nonprofit's digital platform, covering React front-end work and Node.js backend services.
- Worked independently with full ownership of technical decisions and production maintenance.

Fullstack Developer | [Remita](#) / [SystemSpecs](#)

Fintech / Banking • 2021 – 2022

- Built fullstack features for a fintech/banking platform, integrating RESTful APIs and cloud services in a regulated environment.
- Worked within Agile/Scrum delivery cycles alongside cross-functional product and engineering teams.

Backend Developer | [Chowdeck](#)

Remote • Mar 2021 – Nov 2021

- Built backend services in Python and Node.js, integrating RESTful APIs for a food delivery platform.

Web Development Instructor | [Innovate Space](#)

Nigeria • 2022 – 2023

- Taught web development fundamentals, including Python, JavaScript, HTML, CSS, and React, to students in a hands-on format.

OPEN SOURCE & COMMUNITY

- ai-interviewer (github.com/Aikay-dev/ai-interviewer): an AI-powered real-time interview assistant that transcribes speech with Whisper and generates personalized answers.
- useStarVisualization (github.com/Aikay-dev/useStarVisualization): a custom React Hook for rendering star ratings consistently across React projects.

EDUCATION

MSc Management & Production Engineering, Warsaw University of Technology, Warsaw, Poland (Feb 2026 – Present)

BSc Mechanical Engineering, First-Class Honours, Landmark University, Nigeria (2018 – 2022)

LANGUAGES

English: Fluent (C1+) • Polish: Beginner (A1), actively learning
